

To improve investment in buildings and infrastructure to solve space, maintenance, efficiency, and security concerns.

## Buildings and Infrastructure

## Funding & Revenue Generation

To improve the budget situation of Eau Claire County through identification of cost savings, new sources of revenue, and prioritized budget reallocations in an environment of fixed levy rates.

To develop a process for continuous improvement of modern and integrated technology infrastructure, including training, shared knowledge, automated workflow processes, and adequate security.

## Technology

# STRATEGIC PLAN 2018-2020

To provide quality, innovative and cost effective services that safeguard and enhance the well-being of residents and resources.

## Staff

To transform Eau Claire County into a preferred place of employment (hiring and retention), including addressing needs for compensation, benefits, succession planning and work culture.

To develop a countywide process to identify relevant services based on a defined evidence-based needs assessment, which will include criteria to determine adoption, continuation, or termination of specific programs and services.

## Provision of Services

## Communication

To develop an effective, modern, and accessible communications system, including internal, external and advocacy, to better serve and engage the citizens of Eau Claire County.
